

The NEOCLEAN R cassette is a disposable cassette cleaning tool that is palm sized, light weight and easy to use for cleaning fiber optic connector end faces. This cassette cleaning package offers an economical, all-dry cleaning solution. The sealed container prevents cloth contamination from external debris.

The NEOCLEAN R is easy to use and works by simply turning the cleaning wheel to expose a new section of cleaning cloth and swiping the connector end face.

The NEOCLEAN R provides 200+ cleanings per cassette. Cleaning cloth is made from a highly dense woven fiber to reduce fraying during use.

Features

- Cleaning cloth is washed in deionized water in a Class 10000 clean room
- Final cassette assembly completed in an environmentally controlled clean room
- Cassette case housing is made with antistatic resins

Applications

- Installation sites for public and private networks
- Photonic testing and research laboratories
- FTTX work sites using OptiTap®-compatible connectors
- Production of fiber optic cable assemblies
- Kits for fiber optic inspection, testing or cleaning

P/N: 8505

P/N: 8504

Part Number	Description
