

FOR IMMEDIATE RELEASE – June, 2009

**MTP® brand MPO adapter for SC panel cutouts:**

US Conec Ltd. announces the immediate availability of reduced footprint MTP® brand adapters. This novel, streamlined MTP® brand adapter platform has the same panel cutout dimensions as that of SC and duplex LC connectors. The condensed cross sectional area of these leading edge adapters greatly simplifies the transition from simplex or duplex connectivity to higher density MTP® brand connectivity. Panel cutouts per TIA/EIA 604-10A; M-3 and M-4 are compatible with these new, multi-fiber connector adapters which can support up to 72 Fibers per TIA 604-5D.

The new SC-footprint, MTP® brand adapters are supplied with an innovative dust plug produced from a custom formulated engineering thermoplastic resin. This new dust plug provides superior protection for the MTP® connector mounted internal to the bulkhead. This advanced engineering material is V0 rated, RoHS and REACH compliant, static dissipative, and has a TML out gassing spec of <1% per ASTM E595 eliminating potential deposits onto sensitive optics which can impede signal integrity.

US Conec Ltd. manufactures single-mode and multimode MT style and contract multifiber ferrules, the MTP Brand MPO connector family, optical flexible circuits and fan outs, contract precision molded parts for optical packaging, and sells OptiPop and IBC™ brand dry cloth connector cleaning products.
