

## **IBC™ Brand Cleaner M20 for SMPTE 304M and other 2.0mm Fiber Optic Connector Cleaning**

The IBC™ Brand Cleaner M20 specifically designed for 2.0mm ferrule based connectors including the SMPTE 304M. This mechanical cleaning tool uses a dry cleaning strand to remove dust and liquid residues off the fiber optic termini in the SMPTE 304M and other 2.0mm ferrule connectors. The cleaning tip is able to reach the recessed ferrules and eliminates the need to remove the connector sleeve for cleaning.
